## PROGRAMMING LANGUAGES/SKILLS

**Languages:** JavaScript, Java, Python, HTML5, CSS, C#, SQL | **Frontend:** Next.js, ReactJS, Bootstrap, Vue.js, Vuetify

**Backend:** Node.js, Express, Django | **DevOps:** Git, Linux, Docker, Google Cloud Platform, Postman, Azure DevOps

## WORK EXPERIENCE

**Mely.ai** June 2021 – Present  
Software Developer Intern Montreal, QC

- Worked in a team of four engineers to build Mely.ai platform for data extraction and customs shipping/logistics
- Redesigned SQL database to better reflect platform structure and refactored API endpoints to work with database
- Designed and implemented Vue pages to showcase document data, with a focus on modern design and accessibility
- Implemented document search using python and SQLAlchemy and created related web form and API endpoints

**Freelance Website Builder** January 2021 – Present  
Front End Developer Vancouver, BC

- Using Squarespace, helped deploy <https://www.blacktopautocare.ca> and <https://www.perfectlandscapingbc.ca>
- Advised small business clients on available web services and technology improvements based on company needs
- Responsible for creating wireframes, assisted with frontend development and continuous deployment of sites
- Educated and empowered clients to maintain sites to decrease costs

**Apple Inc** April 2017 – November 2019  
Technical Expert Surrey, BC

- Resolved technical issues on iOS, MacOS, and other Apple devices, and physically repaired mobile devices
- Led team in sessions completed and session time in 3 of 8 quarters, while maintaining high net promoter scores
- Worked with internal troubleshooting tools and command line to image and restore Apple devices

## PROJECTS Visit <https://sukhmanbhuller.com> for more information

**Personal Website:** Visit | [GitHub](#)

Portfolio site built using Django framework. Fully responsive and mobile friendly design created using Bootstrap and deployed using Docker on Google Cloud, using Nginx for serving static files.

Tech stack: Django (Python), JavaScript, jQuery, CSS, HTML, Bootstrap, Google Cloud Platform

**Fitness Facility:** [GitHub](#)

Customer resource management software aimed at the fitness/health sector that can handle a variety of data operations such as modifying classes, clients, users, employees, payments, and schedules. App has multiple views.

Tech stack: MySQL, Java, JDBC, JavaFX, HTML

**Calculator:** Visit | [GitHub](#)

Calculator built with JavaScript and styled with CSS and Bootstrap. Calculator can take inputs and handle basic arithmetic, scientific notation, store memory values, and delete functionality. Hosted on personal site.

Tech stack: JavaScript, HTML, CSS, Bootstrap

**Mortgage Calculator:** [GitHub](#)

Built mortgage calculator that provides Canadian mortgage rates based on user entered details and recalculates on the fly. Part of 24-hour challenge for WOWA. React frontend interacts using API with express backend.

Tech stack: Next.js, JavaScript, Express, ReactJS, Tailwind CSS, MySQL

**Dual Screen Study:** [GitHub](#)

Script to automate setting up my displays with correct applications in correct orientation so I can get started faster.

Tech stack: Python, AppleScript

## EDUCATION

**University of British Columbia,** Expected 2022  
Vancouver BC, Bachelor of Science (Combined Major in Science) Vancouver, BC

- President of CMS Student Association (April 2019-April 2020)
- UBC Entrance Award (2016)
