PROJECTS

Visit <https://sukhmanbhuller.com> for more information

Personal Website: [Visit](#) | [GitHub](#)

Portfolio site built using Django framework. Fully responsive and mobile friendly design created using Bootstrap and deployed using Docker on Google Cloud, using Nginx for serving static files.

Tech stack: Django (Python), JavaScript, jQuery, CSS, HTML, Bootstrap, Google Cloud Platform

Fitness Facility: [GitHub](#)

Customer resource management software aimed at the fitness/health sector that can handle a variety of data operations such as modifying classes, clients, users, employees, payments, and schedules. App has multiple views.

Tech stack: MySQL, Java, JDBC, JavaFX, HTML

Calculator: [Visit](#) | [GitHub](#)

Calculator built with JavaScript and styled with CSS and Bootstrap. Calculator can take inputs and handle basic arithmetic, scientific notation, store memory values, and delete functionality. Hosted on personal site.

Tech stack: JavaScript, HTML, CSS, Bootstrap

Mortgage Calculator: [GitHub](#)

Built mortgage calculator that provides Canadian mortgage rates based on user entered details and recalculates on the fly. Part of 24-hour challenge for WOWA. React frontend interacts using API with express backend.

Tech stack: Next.js, JavaScript, Express, ReactJS, Tailwind CSS, MySQL

Dual Screen Study: [GitHub](#)

Script to automate setting up my displays with correct applications in correct orientation so I can get started faster.

Tech stack: Python, AppleScript
